

**Atlantic Golf & Turf is pleased to announce our latest initiative...**

**Atlantic Cares.**

**Over the last several years, many of our employees, customers, family members, and friends have been effected by various forms of cancer. Since its inception, our company has prided itself on being leaders in education, and science based turfgrass research and consulting.**

**In keeping with that spirit and in an ongoing attempt to give back in any way that we can, we have decided to initiate a new program tied to our innovative new fertilizer line, HydraSmart. The program is simple. For every gallon of Hydra Smart products sold, Atlantic Golf and Turf will donate \$1 to research efforts to end all forms of cancer. Please join with us in funding the vital, ongoing research that will help prevent and cure all forms of cancer.**

**Together, we can make an impact!**

The logo for HydraSmart features the word "Hydra" in a blue, sans-serif font and "Smart" in a grey, sans-serif font. A green leaf icon is positioned between the two words, with its stem extending from the top of the "a" in "Hydra" and its blade pointing upwards and to the right.

# HydraSmart

## HIGH EFFICIENCY FOLIARS

HydraSmart Nitrogen is a low salt, polymer-based source that provides rapid, yet sustained feeding through both the root and the leaf tissue. Acetate and glucoheptonate technologies, along with our chelation process help to promote the plant-soil microbe relationship and improve efficiency of nutrient uptake.

### Hydra-Fuse 18-0-6

Rate 3.0-8.0 oz/1,000

Core N product with phosphite. 50% Triazone N for tremendous color and a predictable growth curve. Low salt, No nitrates, No chlorides.

SAR

### Hydra-CAL 4-0-0

6% Ca, 1% Mg, .02% B

Rate 1.5-3.0 oz/1,000

Multi-blend of acetate and glucoheptonate, chelated calcium enhances cell walls.

SAR

### Hydra-Fe 12-0-0

6% Fe, 2% Mn, .25% Mg

Rate 2.0-8.0 oz/1,000

Rapid color response and enhanced photosynthesis for outstanding color.

### Hydra-Mn Combo

4% Mn, 3% Fe, 1% Mg

Rate 1.5-3.0 oz/1,000

Designed with complexed organic acids to deliver improved and lasting tissue color.

### Hydra-Kace 0-0-29

Rate 1.5-3.0 oz/1,000

Highest foliar absorption potassium input on the market. Improves rooting, drought, and cold tolerance.

### Hydra-Fuse 12% Si

Rate 2.5-3.5 oz/1,000

Silica deposits in the cuticle provide physical resistance to stress. Reduces ball marks and wear while improving quality of cut.

SAR

### Hydra-Phite Plus 0-0-28

Rate 3.0-4.0 oz/1,000

Highly concentrated potassium phosphite. Turf quality is enhanced and becomes resistant to plant stress and diseases.

SAR

### Hydra-Minors

Rate 1.0-3.0 oz/1,000

Hydra-Minors is a supplemental micronutrient package designed for foliar and soil applications for turf and ornamentals. Silica is added to enhance Stress resistance and plant vigor.

SAR

### Hydra-Boost 3-10-15

w/ Potassium Phosphite

Rate 1.5-3.0 oz/1,000

Hydra-Boost is a maintenance / starter potassium phosphite combined with polyphosphate. Hydra-Boost is designed to enhance turf energy, recovery and root growth.

SAR

= Desert Plant Extracts

SAR

= SAR Elicitors (Systemic Acquired Resistance)

Is excited to announce  
a new product line in  
2020

**CoastalCal™**  
CALCIUM ENRICHED PRODUCTS

### Why CoastalCal ?

CALCIUM ENRICHED PRODUCTS

- ◆ Improves soil pH in weeks rather than months at significantly lower application rates of standard lime products.
- ◆ Improves germination, enhances green color, stimulates root growth and promotes microbial activity.
- ◆ Humic acid frees up nutrients in soil, helps reduce compaction and adds essential organic material.
