

Ride the Wave.....To Stress Free Turf!

5 Step Water Savings Program

Step 1– *Early Spring*

GreenWave 20-0-10 50% XCU, with Dimension and Synergy Surfactant

Quick spring green up with pre-emergent weed control

Synergy provides superior dispersion of Dimension and up to 45 days water retention

Step 2– *Late Spring/Early Summer*

GreenWave 22-0-12 50% MU, with Mallet, Lambda, and Synergy Surfactant

Sustained growth with outstanding control of grubs and surface feeding insects

Synergy provides superior dispersion of Imidacloprid and up to 45 days water retention

Step 3– *Mid-Late Summer*

GreenWave 16-0-6 Organic Base, 50% XCU with Sixteen90 Surfactant

Low burning, controlled feed perfect for Summer

Sixteen90 provides excellent water retainage during drought.

Step 4– *Late Summer-Early Fall*

GreenWave 8-0-24 75% MU, with Sixteen90 Surfactant

High Potassium content for heat, drought tolerance

Sixteen90 provides excellent water retainage during drought.

Step 5– *Fall*

Synergy Surfactant on Pelletized Lime

Lime is a good source of calcium which aids in germination/recovery.

Synergy provides up to 45 days water retention
