

Atlantic Golf & Turf is excited to announce our initiative ...

Here at Atlantic Golf & Turf, we have always felt that science based turfgrass research and education is a key component of our business and our industry as a whole. We pride ourselves on staying up to date on new technologies and innovations in the industry along with having close relationships with the turfgrass research programs at our local universities.

Our team at Atlantic Golf & Turf has been heavily impacted by cancer in the last several years; with team members being diagnosed as well as having customers, friends and family members affected by this daunting disease.

No one likes feeling helpless in the face of such a situation.

Atlantic Golf & Turf is excited to announce an initiative that highlights our belief in the importance of research, underscores our commitment to help in the fight against cancer, and brings an innovative new fertilizer line to our customers ...

For every gallon of
HydraSmart
HIGH EFFICIENCY FOLIARS
purchased, Atlantic Golf & Turf will donate
\$1 to cancer research here in New England.

Together, we can make an impact!

HydraSmart

HIGH EFFICIENCY FOLIARS

Hydrasmart Nitrogen is a low salt, polymer-based source that provides rapid, yet sustained feeding through both the root and the leaf tissue. Acetate and glucoheptonate technologies, along with our chelation process help to promote the plant-soil microbe relationship and improve efficiency of nutrient uptake.

= Desert Plant Extracts

SAR

= SAR Elicitors (Systemic Acquired Resistance)

Hydra-Fuse 18-0-6

Rate 3.0-8.0 oz/1,000

Core N product with phosphite. 50% Triazone N for tremendous color and a predictable growth curve. Low salt, No nitrates, No chlorides.

SAR

Hydra-CAL 4-0-0

6% Ca, 1% Mg, .02% B

Rate 1.5-3.0 oz/1,000

Multi-blend of acetate and glucoheptonate, chelated calcium enhances cell walls.

SAR

Hydra-Fe 12-0-0

6% Fe, 2% Mn, .25% Mg

Rate 2.0-8.0 oz/1,000

Rapid color response and enhanced photosynthesis for outstanding color.

Hydra-Mn Combo

4% Mn, 3% Fe, 1% Mg

Rate 1.5-3.0 oz/1,000

Designed with complexed organic acids to deliver improved and lasting tissue color.

Hydra-Kace 0-0-29

Rate 1.5-3.0 oz/1,000

Highest foliar absorption potassium input on the market. Improves rooting, drought, and cold tolerance.

Hydra-Fense 12% Si

Rate 2.5-3.5 oz/1,000

Silica deposits in the cuticle provide physical resistance to stress. Reduces ball marks and wear while improving quality of cut.

SAR

Hydra-Phite Plus 0-0-28

Rate 3.0-4.0 oz/1,000

Highly concentrated potassium phosphite. Turf quality is enhanced and becomes resistant to plant stress and diseases.
